

CSX.0030

DETERG-A

Cleaner, descaler, saline converter with an acid pH.

Dosage

0.03 - 0.25 kg /m²
(Recommended: 0.1 kg /m²)

Packaging

- Bottle 1 kg
- Plastic can 6 kg

Application

- Scrubbing brush
- Sprayer
- Brush

Family
Consilex

Type

Cleaning and anti-fungal solutions based on bland acids

Product Lines

- Building
- Opus
- Sanageb

Functional Categories

- **Transparent waterproofing of tiled terraces and balconies**
- **Anti-efflorescence treatment for masonry**
- **Deep cleaning of supports**

Components

Single-component

Appearance

Liquid

General description

Concentrated solution of buffered acid, anionic and non-ionic surfactants, highly biodegradable containing specific corrosion inhibitors.

Fields of application

Operations of saline removal and stabilisation, removal of deposits of lime, gypsum, saltpetre, mosses; deep cleaning of leakages and media in general. Particularly suitable as a detergent in waterproofing interventions with PROTECH BALCONY.

Available colours

- Transparent

Basic features

Mix with water:
1:10 _

Nonflammable

Shelf-life:
12 months

Use wearing protective glasses

Use wearing protective gloves

Technical specifications

Biodegradability: 90 %

pH: 1 _

Tools cleansing

- Water

Applicable on

- Plasters
- Concrete
- Cement-based or lime-based mortars
- Bricks
- Mixed walls (bricks and stones)
- Stone walls

Instructions for use

Dilute the product in water based on the nature and size of the incrustation and/or of salt fouling to be removed. Spread the solution with a spray or brush, or even by pouring directly on the fouling to be removed. Leave on for a few minutes. Wash the foam produced by the acid reaction with copious amounts of water .

DETERG-A can be used in various dilution ratios: from pure (undiluted) up to one part of product in 10 parts of water.

In preparation of the supports to be waterproofed with PROTECH BALCONY, consider diluting the product 1:4, for a consumption of 400 g/m² of solution. In this case, the consumption of DETERG-A is about 1 litre of product to dilute per 10 sqm of tiled surface to be waterproofed.

Storage and preservation

Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance. Store the product at a temperature between +5°C and +35°C.

Warnings, Precautions and Ecology

Technical and performance data outlined in this document are the result of laboratory testing conducted in a conditioned environment, as such they can result as considerably changed from operating and application conditions. The need follows to carry out preliminary tests in actual use conditions.

The user is required to check the product's most recent Material Safety Data Sheet, reporting physical-chemical and toxicological data, risk phrases and other useful information on how to safely transport, use and dispose of the product and its packaging. It is also reminded that the product and its packaging must not be dispersed in the environment for any reason.

Do not apply on marble surfaces, terracotta, natural stone, polished lead floors and galvanised surfaces.

It is a corrosive product, pay attention to the security fact sheet. Always wear gloves when handling.
