PRERIT COMPOUND

Multi-functional powder mix for
washed gravel flooring

Customs Code

3824 4000

Packaging

- Bag 25 kg

Application

- To be added to other
components

Family
Admix

Type
Powder additives for concrete, mortars and grouts

Product Lines
• Building
• Floor

Functional Categories
• Construction of concrete floors with the technique of the
'washed gravel'

Components
Single-component

Appearance
Powder

General description

Additive power mix for enhanced performance of the functional characteristics of the concrete used to create architectural floors of landscaping/environmental worth, with a "washed gravel or visible gravel" technique.

General features

PRERIT COMPOUND is an additive mix of advanced technology content, easy to dose, safe and reliable, that gives greater durability over time and resistance to concrete for the design to use, allowing you to calmly work using natural aggregates to make "creative" floors, with a natural appearance. The components of the product are represented by the particular and balanced mix of reactive fillers with a micro-silicate base in multi-filament polypropylene, aerating, fluidifying and stabilising agents, specifically designed to create the type of flooring indicated, guaranteeing the concrete, which was correctly designed, a significant increase in overall performance, mechanical resistance, better durability, enhanced intrinsic permeability, reduced risk of cracking, greater resistance to frost/defrost cycles, abrasion and knocks. The concrete with this added will resist aggression over time more than any other floor.

Fields of application

Squares in public and/or private places, roads with traffic, footpaths, pedestrian passages, lanes and lane ways in parks and gardens, access ramps to garages, swimming pool surrounds, etc.

Basic features

Nonflammable

Shelf-life:
12 months

Temperature of use:
+5/+30 °C

Available colours
White ivory

Tools cleansing

• Water

Applicable on

• Concrete
• Floor screed

Instructions for use

Adding PRERIT COMPOUND to a correct mix of binders (grey or white cement 32.5 R or 42.5 R Type II-A-LL) and aggregates (from select and clean quarries, natural or coloured, round or quarry split, in adequate granules from 6/8 to 12 mm) in the quantity planned for the specific use. Add the necessary water and fully mix, until you obtain an even mix free of lumps.

Storage and preservation

Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Protect from humidity.
